

What you're missing matters: New dimensions of biology revealed by full-length sequencing of single-cell and spatial assays

Oxford Nanopore and 10X Genomics Lunch and Learn

Register now

Time: 12:00 PM – 1:00 PM

Date: Thursday, September 28th, 2023

Location: Harvard University, NW room 425

Join 10X Genomics, Oxford Nanopore and the Bauer Core as we dive into how single cell RNA sequencing is enhanced with Oxford Nanopore's long read sequencing. Discover New dimensions of biology revealed by full-length sequencing of single-cell and spatial assays and learn how sSNVs and isoforms are impacting your cell populations at single cell resolution.

Food and beverages will be provided. Space is limited, so register early to reserve your spot. [Harvard University Bauer Core Single cell Registration](#)
